

Softtek Selected Among Top 25 SAP Service Providers by Independent Research Firm

Independent Report recognizes its strong capabilities in SAP consulting and support services and leadership in Latin America

MONTERREY, Mexico – September 22, 2009 – Softtek, a global provider of IT and business process solutions and the largest private IT service provider in Latin America, announced today that it has been recognized as one of the top 25 SAP service providers in a September 2009 report by Dana Stiffler of AMR Research, Inc. The report, titled “The Top 25 SAP Service Providers,” assessed over 40 SAP services partners to highlight the top providers in a number of different categories, including revenue, SAP practice onshore/offshore ratios, region, industry and headcount.

Softtek was the only firm headquartered in Latin America to be included in the “Top 25 SAP Service Providers” report. The report states: “Latin American specialists are coming on strong on two separate fronts: local delivery of SAP consulting and support services to very large domestic clients as well as foreign multinationals, and nearshore support for the North American market. They are also serving their clients on a global basis.”

“As creator and leader of the Near Shore[®] Industry, we are pleased to be recognized for our strong capabilities in SAP consulting and support services globally and for our proven leadership in Latin America,” said Beni Lopez, CEO of Near Shore[®] Services at Softtek. “Over the past 15 years, we have created a unique SAP practice by combining strong technical expertise with our Global Nearshore[™] delivery model. We will continue to improve and strengthen our services to further the customer excellence.”

Softtek’s SAP Practice has received numerous recognitions over the past years, including the SAP Award of Excellence in the “Best Regional Partner” for the 10th time in 11 years. Earlier this year, Softtek was named a “strong performer” in the “Forrester Wave[™]: SAP Implementation Providers, Q3 2009” report by Forrester Research, Inc. The report evaluated 18 leading SAP implementation providers based on 60 criteria, including their current product offering, strategy and market presence.

Softtek has earned a strong reputation in the IT & BPO global sourcing industry through its trademarked Global Nearshore[™] model, which pairs world-class execution with global proximity to fill the gap left by India-centric outsourcing models.

About Softtek:

Founded in 1982, Softtek is a global provider of IT and business process solutions with close to 6,000 associates across 30 offices in North America, Latin America, Europe and Asia.
