

See Everything Control Everything Ship with Confidence.

SASO transforms how you monitor and manage shipments across the globe. Real-time tracking, intelligent alerts, and AI-powered insights—all in one powerful platform.

From port to destination, never lose sight of what matters.

Complete Visibility

Your cargo.

Complete clarity.

Modern supply chains span oceans, continents, and borders. Without complete visibility, you're operating blind. SASO gives you a single, unified view of every shipment's location and condition—whether it's on a container ship crossing the Pacific, a freight train through Europe, or a truck on the last mile.

Core Platform Modules

A comprehensive suite of tools designed to give you complete control over your global supply chain operations.

1. Global Location Management

Track every shipment, everywhere, in real-time with GPS-powered precision.

- Interactive dark-themed world map
- Live position updates with route visualization
- Filter by Ship, Train, Trailer, or Plane

2. IoT Telemetry & Monitoring

Know the condition of your cargo, not just its location.

- Temperature & humidity tracking
- Shock & impact detection
- Door status & battery monitoring

3. Intelligent Alert System

Problems surface before they become disasters.

- Configurable KPI thresholds
- Severity-based prioritization
- Alert acknowledgment workflow

4. Multimodal Transport Tracking

One shipment, multiple carriers, complete visibility.

- Visual timeline of transport changes
- Transfer point documentation
- Complete journey history

5. Shipment Visualization

See your entire operation at a glance.

- Progress bars with completion %
- Advanced filtering & sorting
- Quick risk identification

6. Complete Traceability

Every event. Every change. Every timestamp.

- Historical timeline with all events
- Customs clearance documentation
- Searchable by serial number

7. Shipment Creation & Pairing

Start tracking from the moment cargo is loaded.

- Container inventory management
- Automatic IoT tracker pairing
- ETA scheduling & configuration

8. Yard Layout Management

Digital twin of your container yard.

- Multi-level stacking visualization
- Block-based organization
- Real-time occupancy metrics

9. Ship Layout Management

Plan and monitor vessel loading with precision.

- Bow & stern section management
- Six-deck level visualization
- Weight & balance considerations

Powered by 

AI-Powered Assistant

Don't dig through dashboards—just ask. SASO's AI assistant understands your shipment data and delivers instant, accurate answers.

Natural Language Queries

Ask questions about any shipment in plain English.

Real-Time Data

Get instant answers from live shipment data.

Alert Analysis

Receive recommendations based on alert patterns.

Performance Analytics

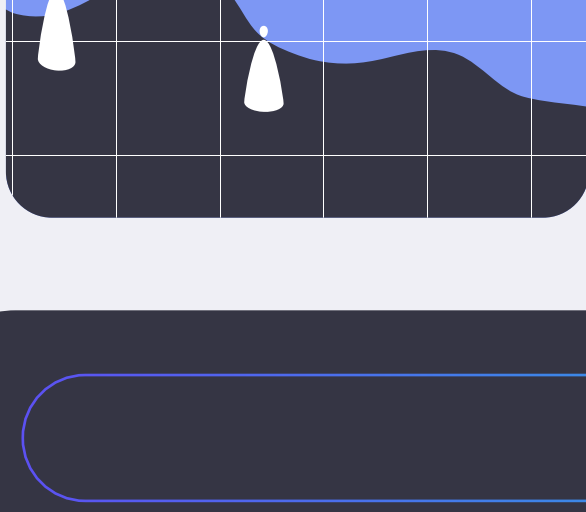

On-demand insights with markdown formatting.

The SASO Difference

See how SASO transforms traditional tracking into intelligent supply chain observability.

Capability	Traditional Tracking	SASO Platform
Data Visibility	Location Only Basic position updates	Location + Condition + Context Complete situational awareness
Update Frequency	Delayed Updates Periodic batch processing	Real-Time Streaming Instant data synchronization
Transport Coverage	Single Mode One carrier at a time	Multimodal Journey Complete end-to-end tracking
Alert Management	Manual Review Reactive problem solving	Intelligent Prioritization Proactive issue prevention
Yard Systems	Separate Systems Fragmented data silos	Integrated Layout Unified management
Status Inquiries	phone Calls Manual status checks	AI-Powered Answers Instant self-service

How we deliver results that transform operations.

Cost-Efficient Automation

Reduce manual workloads and process delays with AI and automation-enabled workflows for container movement, customs, and invoicing.

Outcome-Based Engagements

Service SLAs tied to uptime and workflow accuracy, ensuring reliability and shared accountability for measurable results.

Change-Ready Deployment

Agile rollout with training support to streamline adoption without disrupting your existing operations.

KEY BENEFITS

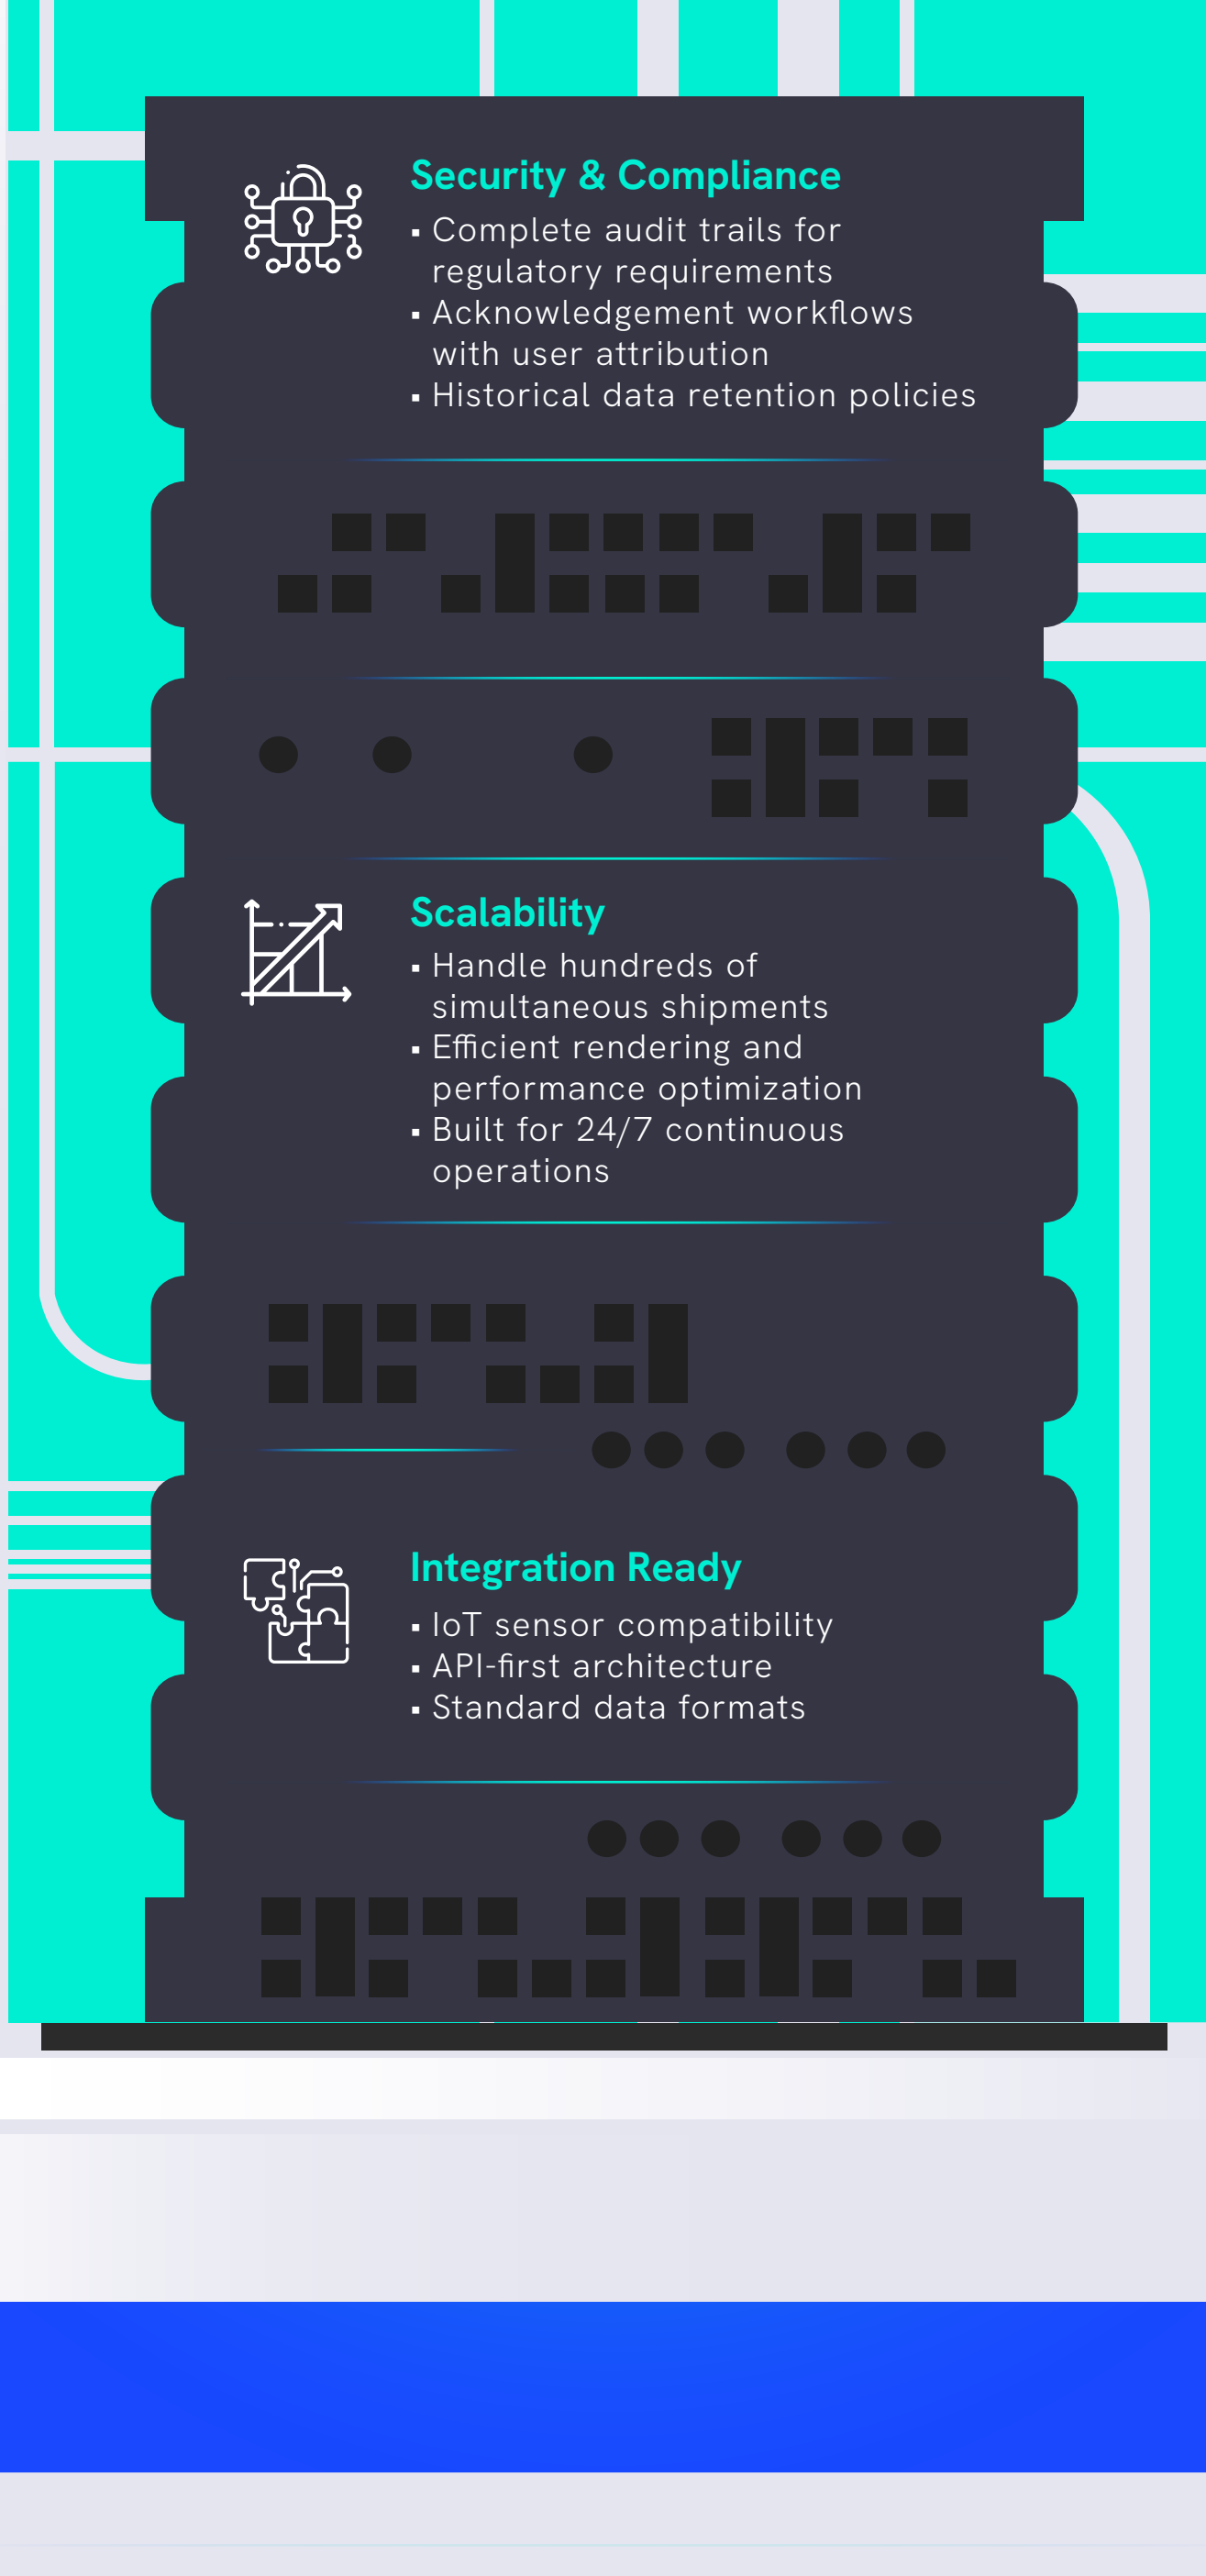

Measurable impact on your bottom line.

★ ★ ★ ★ ★

SASO delivers quantifiable results: **up to 20%** fuel savings through AI-driven container load optimization, **up to 25% lower logistics expenses** with digitalized workflows, and faster customs processing with AI-assisted documentation.

Built for Enterprise Logistics

Security, scalability, and integration capabilities that meet the demands of global operations.

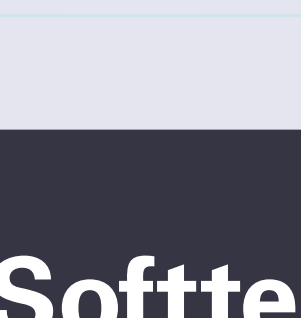

TRANSFORM YOUR SUPPLY CHAIN

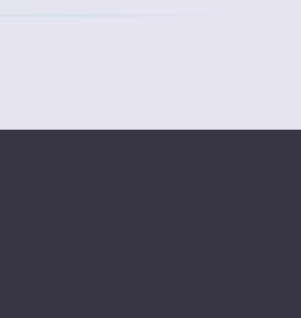

Chain stop guessing. Start knowing.
