Softtek ®

DEV OPS

Continuous Everything. Evolution through code and culture.
At Softtek, we help organizations worldwide level-up their DevOps. We ideate, architect, develop, test, safeguard, and automate the software development process and build custom industry-specific solutions that delight customers and power the intelligent enterprise. For over 39 years, we have been the leader in Global Nearshore software engineering services, helping our global clients build and evolve reliable software solutions and deliver continuous value.

QUALITY, SPEED AND AUTOMATION AT SCALE

The foundation of our DevOps approach is culture. We incorporate agile DevOps practices in every build and strive to align our people, processes, and automation to bring quality and speed to the enterprise software solutions we create and evolve. We streamline the software development processes through our agile DevOps practice by removing silos, introducing automation, and expanding toolchains, leading to better collaboration, maturity, and performance. As a trusted technology partner, Softtek can complement your existing DevOps team or manage the DevOps practice as a continuous evolution partner.

Softtek's DevOps practice delivers the strategy, consulting, and coaching services needed to transform the enterprise. We help build the agile culture and processes the enterprise needs to sustain high-performing teams for quality engineering.

- Deliver with confidence. Realize continuous value across the entire enterprise and accelerate delivery capabilities.
- Radically reduce the time to market of new digital initiatives.
- Achieve new maturity levels with automated tools and practices.
- Improve production speed and code quality with automated testing and quality assurance.

SERVICES

Softtek streamlines the software development lifecycle (SDLC) by offering continuous integration and delivery services. Reduce risk, increase resilience, and accelerate IT-based solutions to market with increased maturity.

Strategy, Consulting & Coaching

As a continuous evolution partner, Softtek can craft a DevOps maturity plan to dramatically reduce the time it takes your organization to launch new digital initiatives.

Microservices

Break the cycle of managing monolithic legacy services with independently scalable and decentralized microservices. Introduce the rapid development of new functionality without the need for cumbersome, costly, and time-consuming development.

Automated Testing

Automation is essential to a mature DevOps practice. Get to market faster, with confidence. Build, test, and release more reliable software faster with FRIDA– our cognitive automation platform.

Continuous Everything Continuous Integration and Deployment

Shift Left. Find and avoid defects early. Accelerate the integration and delivery process with automation.

Quality Assurance

Gain quality and speed and accelerate customer-facing and enterprise software releases faster with an end-to-end QA approach complemented by cognitive and automation tools and processes.

Security & Compliance

Integrating information security and compliance processes into the DevOps lifecycle is critical for delivering safe and secure software.

LEVERAGE PROXIMITY

As a first wave, the idea behind Softtek's Near Shore® brand was to fill the gap left by India-centric global service delivery. This concept remains as a solid differentiator for Softtek, although it's just the beginning of our venture in global services.

The proximity component of the Near Shore® value proposition encompasses the following:

	Offshore	Near Shore®
Project Leaders	**2** One on-site and one off-site	**1** Mobile project leader
On Site Team	**40%**	**20%**
Off Site Team	**60%**	**80%**
Time Zone Differences	**10-13** hrs	**0 hrs** in CST/CDT
Travel (travel time + airfare)	**25 hrs + $2,000** minimum	**4 hrs + $450** average

Near Shore® DELIVERY CENTERS

Softtek has more than 30 offices around the world, 19 of which qualify as Global Delivery Centers as they comply with the following:

- Robust communications infrastructure
- Business continuity & Disaster Recovery plans
- Mature recruiting & training capabilities
- Strong security & regulatory compliance

- Ability to host several clients in isolated physical and logical segments
- Design for growth
- Strong process rigor- (Six Sigma, CMMi, ISO)

Our network of **Near Shore®** Global Delivery Centers is comprised of the following:

NORTH AMERICA
México
- Aguascalientes
- Ensenada
- Guadalajara
- Mexico City(2)
- Monterrey

SOUTH AMERICA
Argentina
- La Plata

Brazil
- Fortaleza
- São Paulo

ASIA
China
- Wuxi

India
- Bangalore

EUROPE
Spain
- A Coruña

Fundada en 1982 por un pequeño grupo de emprendedores, Softtek comenzó en México proporcionando servicios de TI locales y hoy es un líder global en soluciones digitales de próxima generación. La primera compañia en introducir el modelo Nearshore, Softtek ayuda a las empresas Global 2000 a desarrollar capacidades digitales de manera fluida y constante, desde la ideación y construcción hasta la ejecución y su evolución. Su impulso emprendedor la ha llevado a operar en más de 20 países y contar con más de 15,000 profesionales.
