

DIGITAL SECURITY

Fast-track innovation with the added confidence of enterprise data protection.

The acceleration of digital transformation and the need to improve cyber resiliency has increased the priority of digital security and risk mitigation worldwide. Softtek helps organizations meet the challenge of ongoing cybersecurity threats while we keep your organization future-fit.

NEW CYBERSECURITY THREATS CALL FOR SECURITY RESET

The enterprise's exposure to evolving security threats can jeopardize its operations, reputation, regulatory & compliance standing, and financial stability. Softtek's Digital Security and Risk Management practice strengthens security posture by optimizing information security investments. We do this with proven and compliant methodologies for managing enterprise information security risk at scale

Softtek's digital security team accelerated our digital transformation and improved our cyber resilience towards any possible security risk."

SVP of IT - Global CG Conglomerate

Softtek helps organizations reduce risk exposure through a combination of services, including identity & access management, application security, audit management, infrastructure & cloud security, security monitoring & threat hunting, incident response, security automation, and security tools operations management.

- Link your security strategy to business objectives end-to-end and add new metrics-driven services to optimize and automate processes and mitigate IT risk.
- Manage regulatory and compliance mandates, protect information assets and avoid reputational risk.
- Proactively manage IT security defense from ongoing and emerging threats.

SOFTTEK'S DIGITAL SECURITY MISSION

Our business-driven approach focuses on designing and implementing an integrated metrics-driven security architecture. We embed our zero-defect and automation-first approach, resulting in secure business data and resilient digital services to operate with assurance and defend customers and stakeholders from cyber threats.

Protection

Protect your brand's reputation and information assets of the company.

Secure

Secure sensitive information.

Prevent

Prevent the financial loss associated with current information security practices.

Compliance

Stay in compliance with industry regulations and avoid penalties.

SECURITY SERVICES AND PRACTICES

We focus on the most important information security domains, including identity and access management, application security, audit management, infrastructure and cloud security, security monitoring and threat hunting, incident response, security automation, and security tools operations management, which help organizations reduce their risk exposure.

Security and Risk Management

Softtek can design and implement an integrated metrics-driven security architecture through a zero-defect and an automation first mindset, to protect business data and digital services from internal and external threats and attacks.

Security Operations

Softtek provides an effective, practical, and industry-aligned incident response service that integrates people, processes, and technologies to improve their cyber resilience.

Cybersecurity

We provide cyber defense operation monitoring services that help organizations proactively identify threats, risks, and abnormal behaviors within their networks.

Identity and Access Management

We implement policies, frameworks, and tools to manage digital identities seamlessly.

Software Development Security

Softtek protects your applications in the full Software Development Life Cycle, providing secure coding and guidance, supporting compliance with standards and legal requirements, and providing security awareness to the team.

Fraud and Crime Prevention

Services include products and consulting activities for money laundering and fraud prevention to successfully implement a Financial Crime Prevention Framework.

Security Assessment and Testing

Softtek provides clients with penetration security services on demand, including network and application audits, and helps organizations build an effective Penetration Testing Center of Excellence.

Application Security

Preserve applications through data and security privacy, APIs, and secured application development enterprise application.

Protection and Privacy Program

Invest in improving reputation and compliance through Softtek's Protection and Privacy Program—a set of services and technology designed to transform and adapt the company's image with its customers and associates.

WHAT'S BEHIND OUR DIGITAL SECURITY SERVICES?

We built our practice to enhance and automate security processes by proactively introducing and fine-tuning security tools to identify security issues. We leverage a continuous root-cause analysis mindset to harden cybersecurity posture, going beyond the surface to help the enterprise prevent, detect, predict, and respond to known and unknown threats.

- Over 20 years of robust experience tailored to specific industry needs.
- Over 16,000 applications tested
- Over 31 billion lines of code reviewed
- 325K+ assets monitored to prevent sensitive data loss
- 350K+ account management requests performed annually
- 24/7 security operating centers with nearshore flexibility
- A security partnership approach to enable customer's business objectives.
- We help ensure cyber-security, optimize processes, and mitigate IT risk through our metrics-driven service.
- Continuous improvement through KPIs and SLA monitoring.
- Our fully integrated, end-to-end security solutions provide added confidence and new value.
- For over 20 years, our mature security processes have been successfully operationalized and trusted by our clients worldwide.
- Our partnership-first approach leverages the best-of-breed components through our solution-agnostic security partnerships, enabling our customer's business objectives.

Founded in 1982 by a small group of entrepreneurs, Softtek started out in Mexico providing local IT services, and today is a global leader in next-generation digital solutions. The first company to introduce the Nearshore model, Softtek helps Global 2000 organizations build their digital capabilities constantly and seamlessly, from ideation and development to execution and evolution. Its entrepreneurial drive spans 20+ countries and more than 15,000 talented professionals.
