

Transform Every Journey

Air-Flow revolutionizes the passenger experience by intelligently monetizing every moment of the travel journey through personalized, location-aware recommendations.

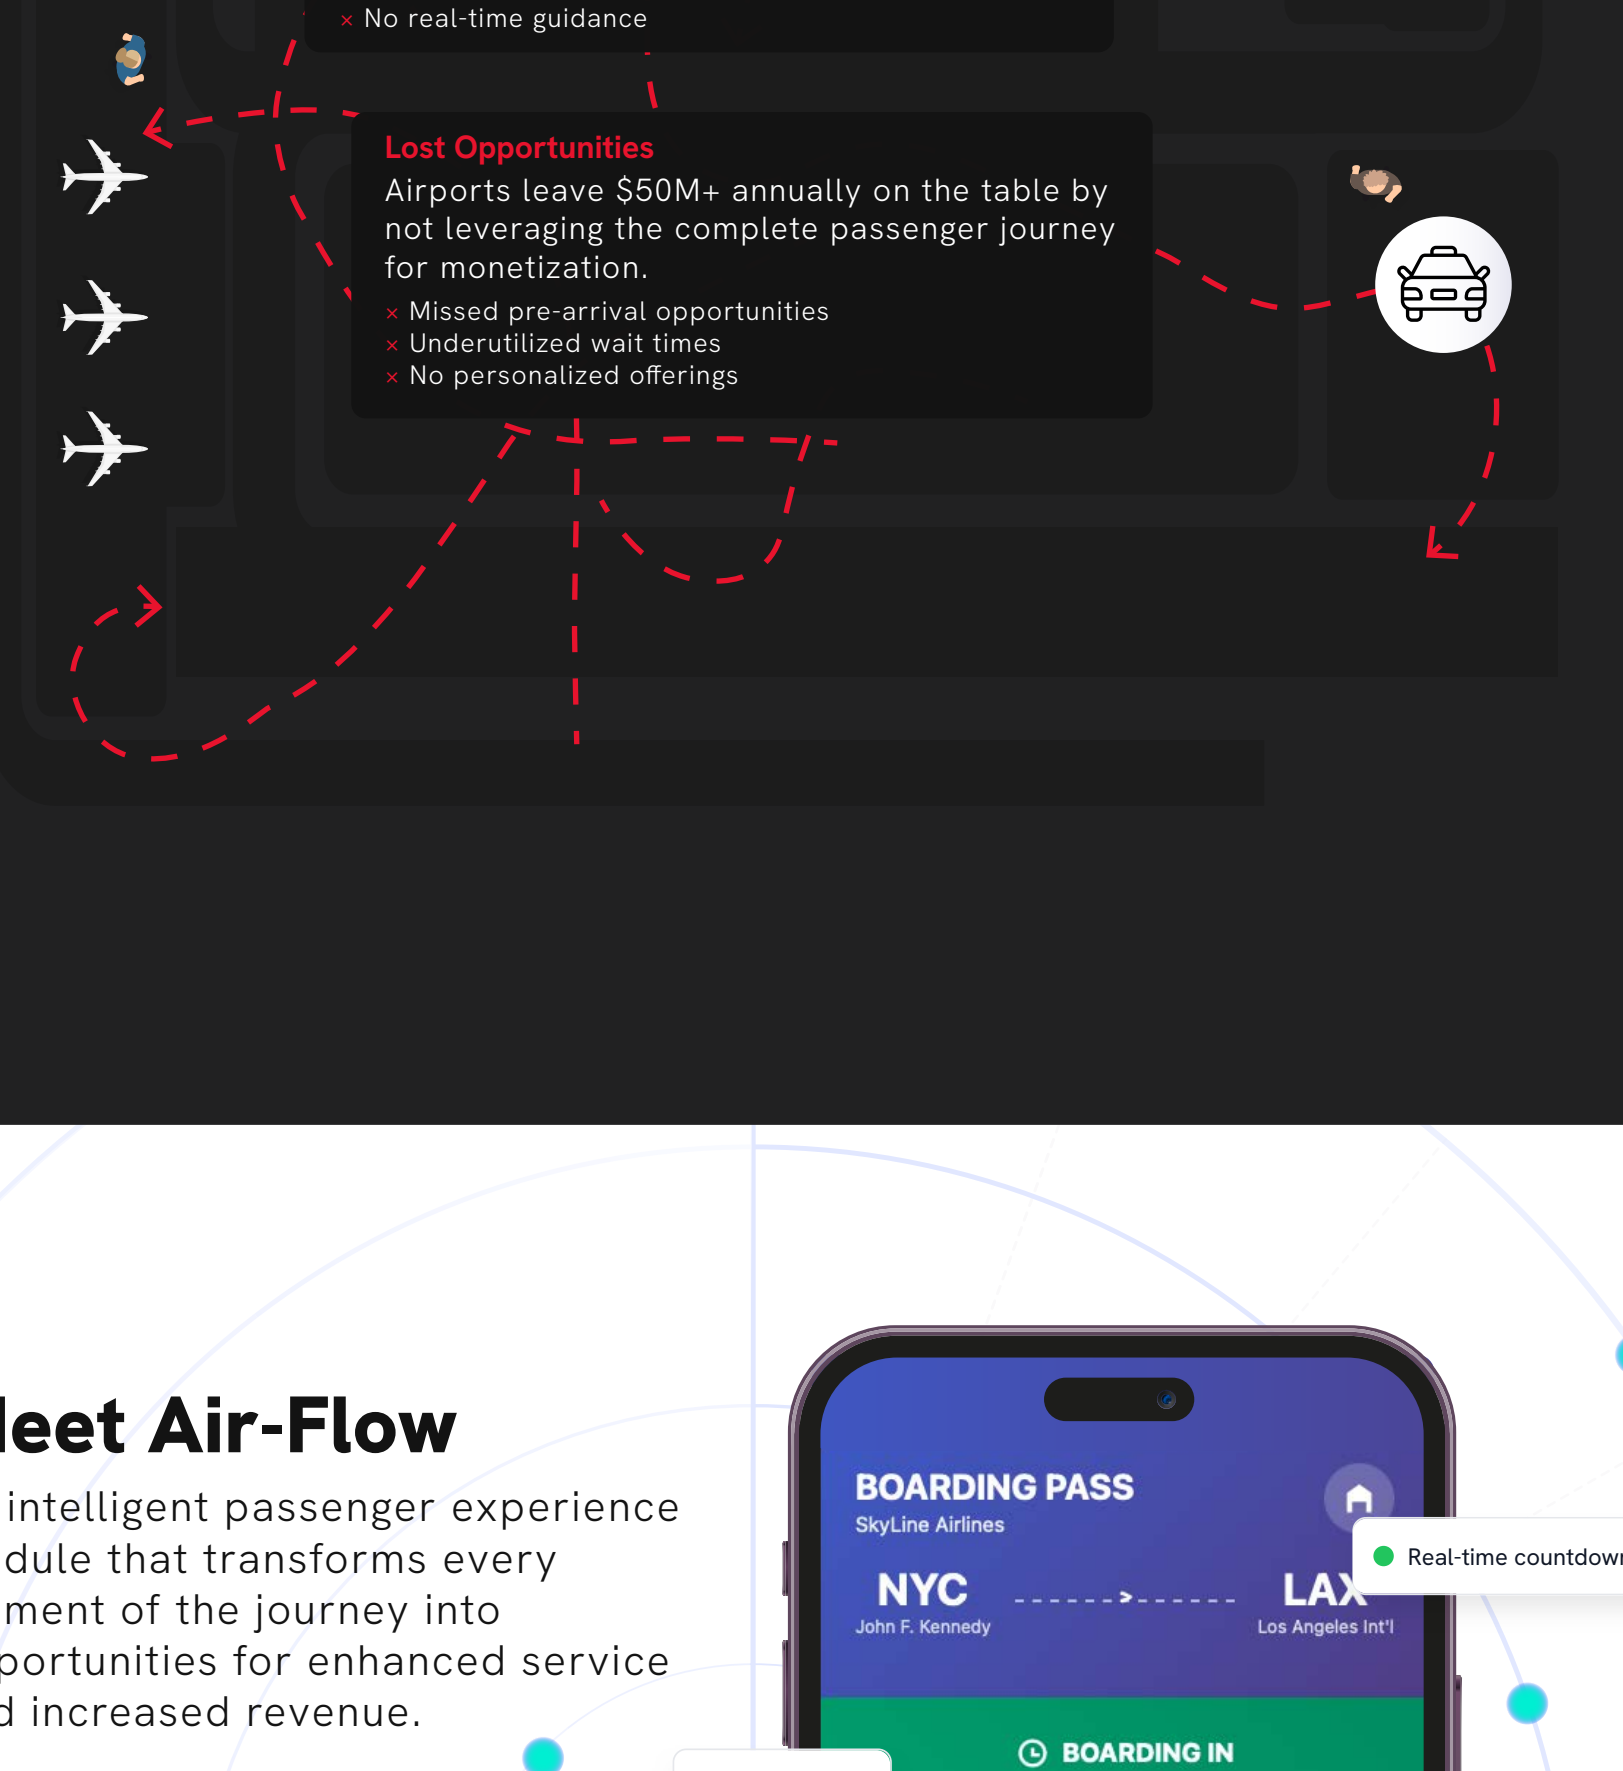

[► Live Demo](#)

40% Revenue Increase Potential **27M** Passengers Annually **8 Min** Average Navigation Time

The Problem

Airports are missing billions in revenue while passengers struggle with poor experiences across their entire journey..

Meet Air-Flow

An intelligent passenger experience module that transforms every moment of the journey into opportunities for enhanced service and increased revenue.

Smart. Adaptive. Profitable.

AI-Powered Intelligence

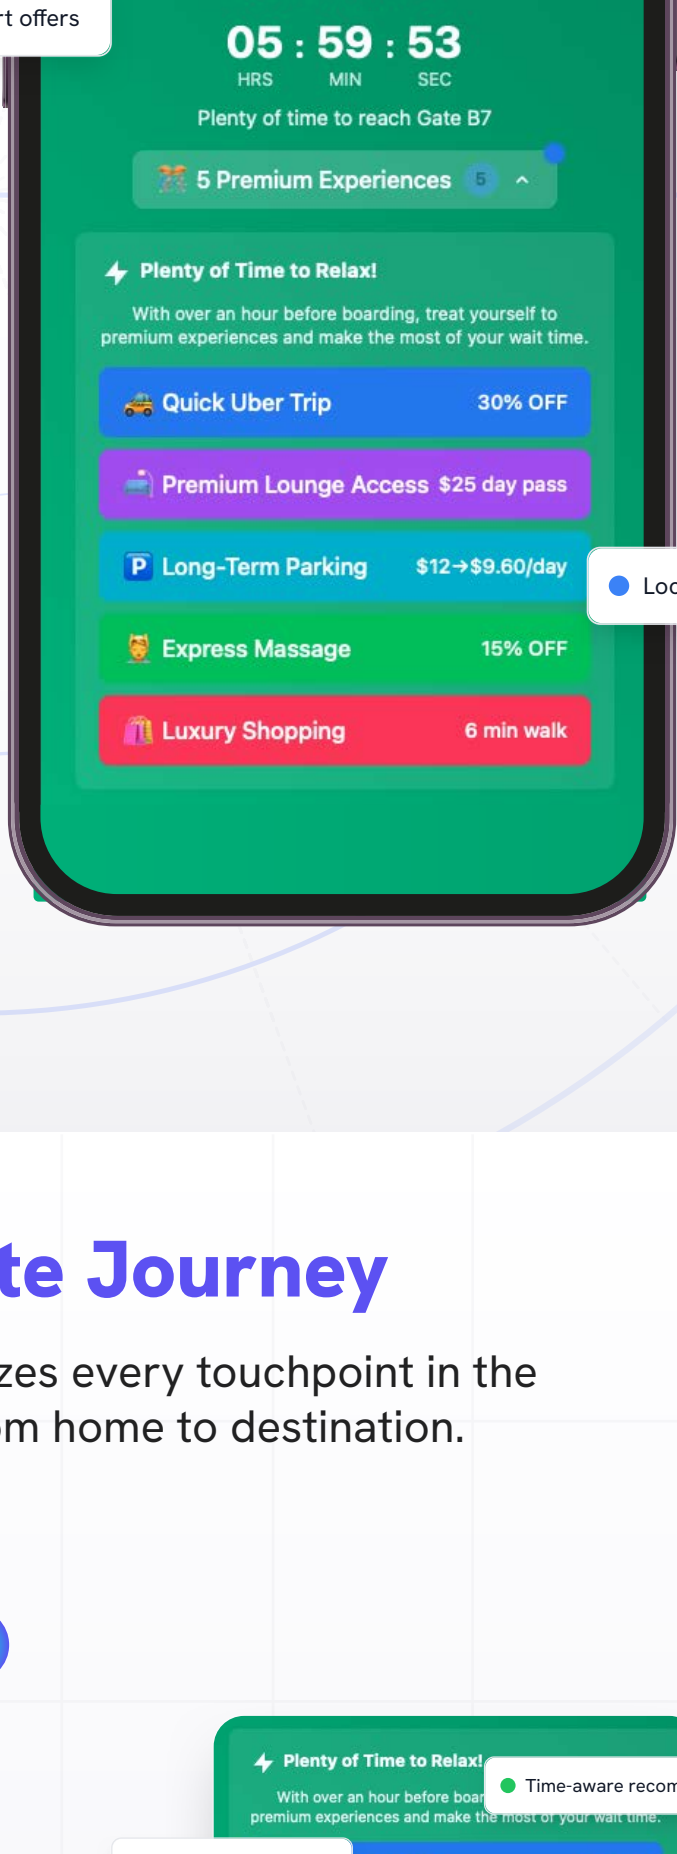

Advanced algorithms analyze passenger behavior, location, and time to deliver perfectly timed recommendations.

Location-Aware Guidance

Real-time navigation with context-aware suggestions based on boarding time, terminal location, and passenger needs.

Revenue Optimization

Monetize every journey moment with personalized offers, services, and experiences that passengers actually want.

The Complete Journey

Air-Flow identifies and optimizes every touchpoint in the passenger experience, from home to destination.

Meet Our Experts

Our world-class team of engineers and specialists brings decades of experience in enterprise IoT, AI, infrastructure monitoring, and digital transformation.

Roberto Cisneros

★★★★★

blauLabs PRO Specialist

IoT solutions expert leading Air-Flow's technical development.

Ubaldo Sánchez

★★★★★

IIoT Solutions Architect

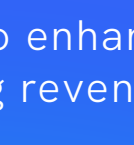

Industrial IoT specialist ensuring seamless airport connectivity.

Explore

Platform Development

Expert software architects and developers specializing in scalable IoT platforms

Infrastructure Specialists

Data center experts with deep knowledge in enterprise infrastructure management

Data Analytics

AI and machine learning specialists focused on predictive analytics and insights

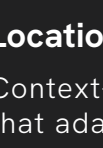

Customer Success

Dedicated support engineers ensuring successful implementations and ongoing optimization

Powerful Features

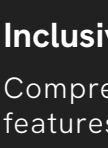

Every feature designed to enhance passenger experience while maximizing revenue opportunities.

Smart Wayfinding

Step-by-step navigation with visual guides, real-time updates, and accessibility support.

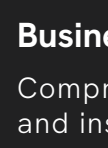

- Visual guidance system
- Accessibility features
- Multi-language support

Smart Timing

AI-powered recommendations based on boarding time, location, and passenger behavior patterns.

- Boarding countdown alerts
- Time-optimized suggestions
- Dynamic offer timing

Revenue Engine

Intelligent monetization through personalized offers, upsells, and partnership integrations.

- Contextual offers
- Partner integration
- Revenue analytics

Location Intelligence

Context-aware services that adapt based on passenger location within the airport ecosystem.

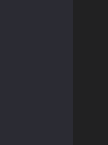

- Real-time positioning
- Proximity-based offers
- Journey state tracking

Inclusive Design

Comprehensive accessibility features ensuring every passenger has an excellent experience.

- Screen reader support
- Voice navigation
- Visual assistance

Business Intelligence

Comprehensive analytics and insights to optimize operations and maximize revenue.

- Passenger behavior analytics
- Revenue optimization
- Performance metrics

Measurable Results

Air-Flow delivers immediate impact across passenger satisfaction and revenue metrics.

+40% Revenue Increase **-75%** Navigation Time **+85%** Satisfaction Score **\$50M+** Annual Opportunity

Seamless Integration with blauLabs

Air-Flow seamlessly integrates with blauLabs platform, a comprehensive solution accelerator developed by Softtek. This integration enhances the efficiency and performance of both digital and physical management operations across the entire airport ecosystem..

OT Integration

Operational Technology

blauLabs bridges the gap between legacy machinery and modern sensors, seamlessly communicating with a wide range of OT systems, from PLCs and SCADA to BMS and MES.

- Connects legacy and modern OT systems
- Collects real-time data from diverse sources
- Provides unified view of operational data
- Enables data-driven decision-making

IT Integration

Information Technology

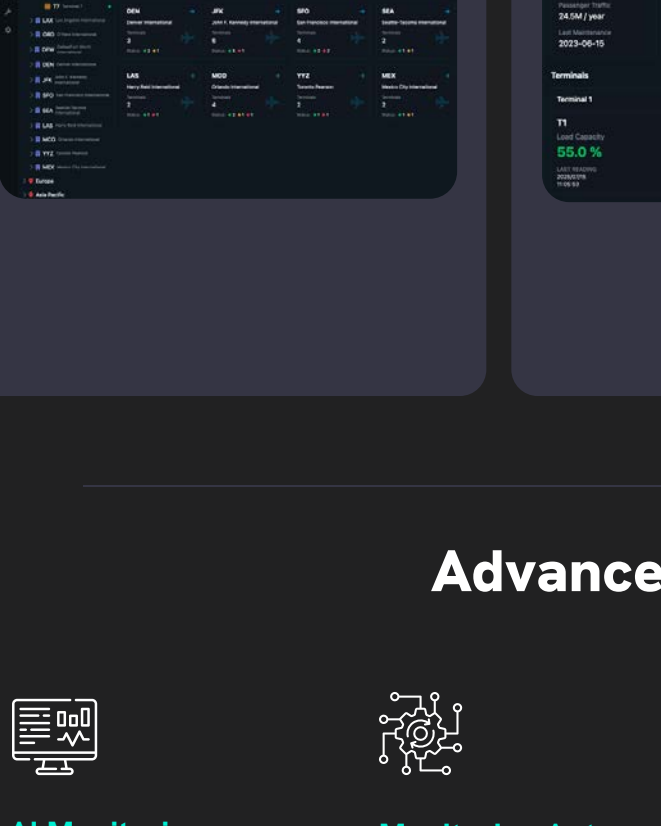

blauLabs integrates with servers, databases, and cloud platforms, connecting APIs, communication protocols, Metadata, and Security Events.

- Integrates and correlates ERP, IoT and OT systems
- Harmonizes business and operational processes
- Provides unified visibility of data
- Offers flexible and scalable architecture

blauLabs Platform in Action

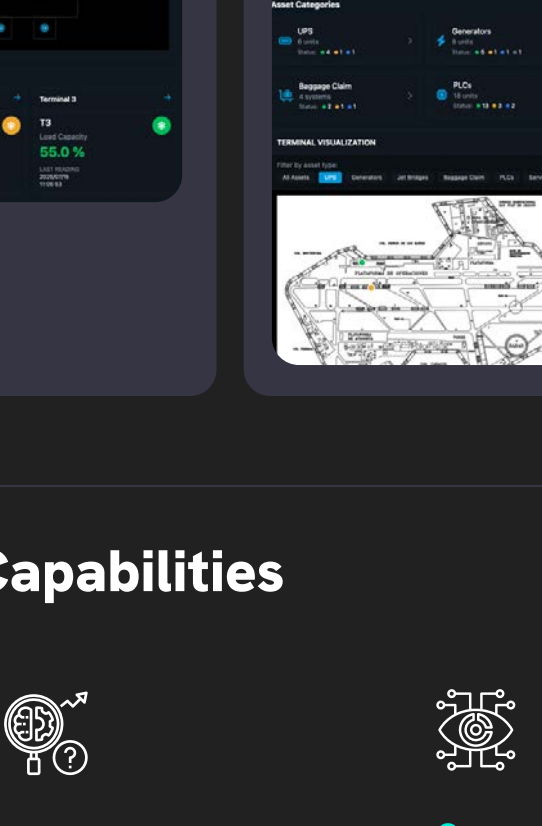

Smart Vehicle Management

Interactive yard management with real-time zone monitoring and capacity optimization

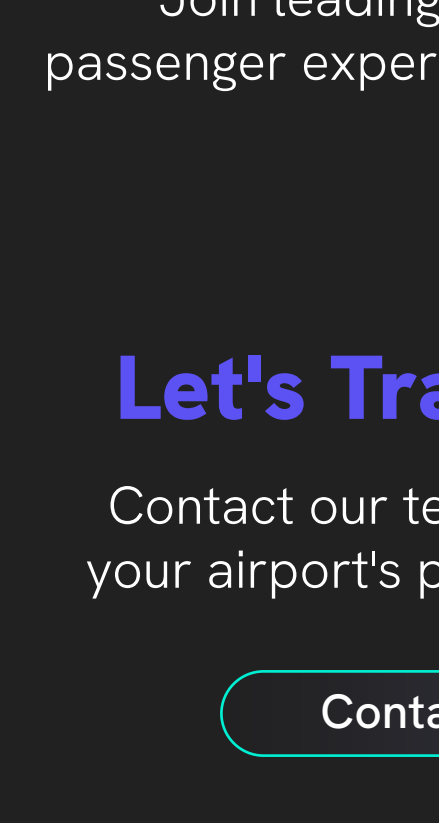

Production Line Intelligence

Real-time OEE monitoring with predictive analytics and automated quality control

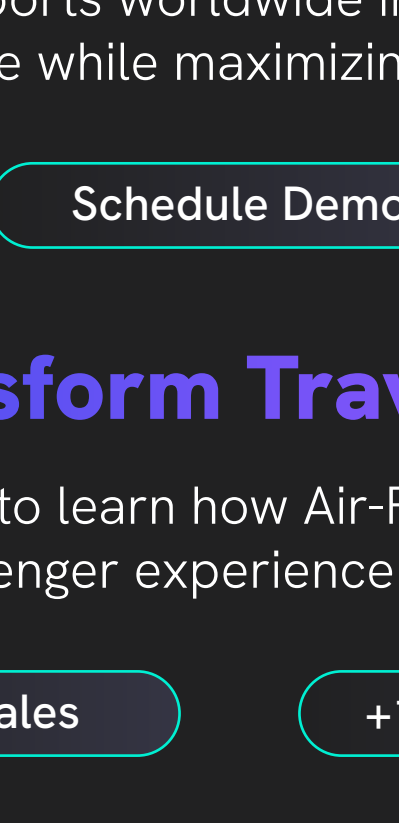

Multi-Airport Network

Centralized monitoring across airport networks with real-time status tracking

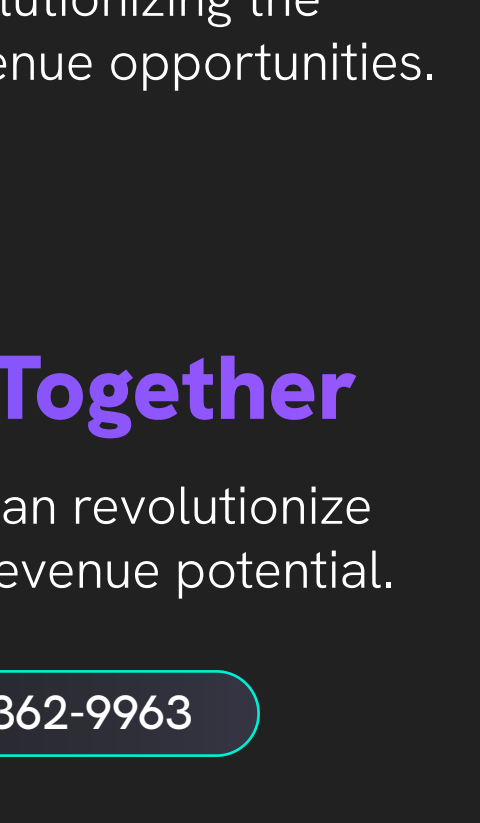

Terminal Operations

Comprehensive terminal monitoring with capacity management and layout visualization

Deep Terminal Analytics

Granular asset monitoring with environmental controls and infrastructure management

Advanced AI Capabilities

AI Monitoring

Intelligent system monitoring and anomaly detection.

Monitoring Automation

Automated monitoring and response systems

Predictive Maintenance

Critical infrastructure health monitoring

Computer Vision

Asset tracking & unified positioning system

Ready to Transform Your Passenger Experience?

Join leading airports worldwide in revolutionizing the passenger experience while maximizing revenue opportunities.
