

MOBILE VALIDATION SERVICES

The mobile revolution: Changing the way you do business

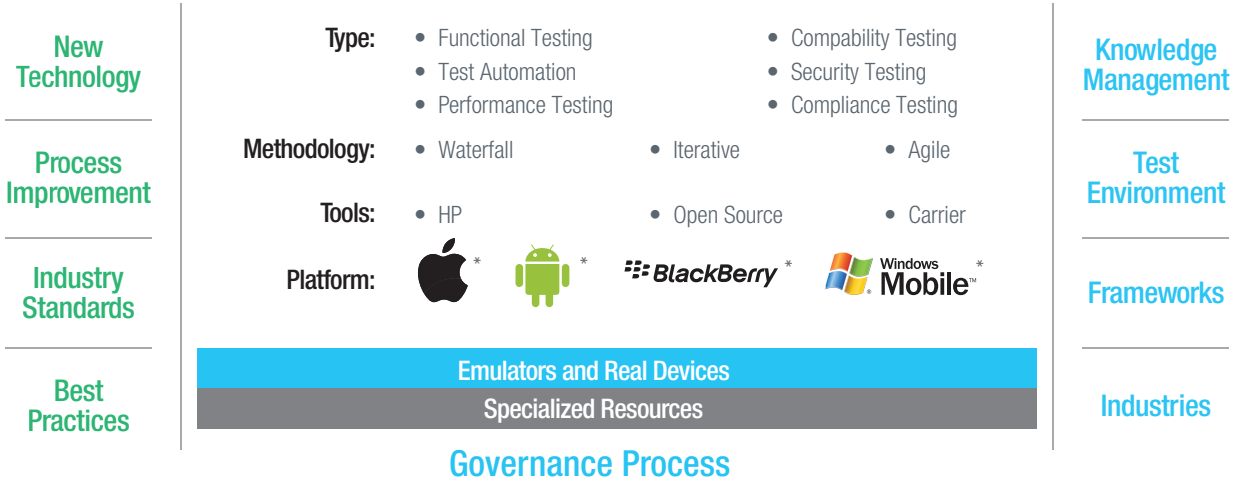

HAVE YOU ADJUSTED YOUR IT STRATEGY TO MEET YOUR BUSINESS DEMANDS WHILE ASSURING FUNCTIONALITY?

From entertainment to financial transactions on the go, mobile devices have brought forth a whole new way of doing things. With 9 out of 10 people being mobile users in the US alone, the enterprise market needs to find a way to offer reliable applications that are available anywhere, any time, on any device, while delivering an enhanced customer experience without compromising data security. With the competition just a click away, the focus on quality has never been greater.

The landscape is complex, the possibilities are endless ... it's easy to feel overwhelmed. How can you guarantee customer satisfaction while shortening development and deployment turnaround times?

To help you sort through the clutter, Softtek has created a package of Mobile Validation Services that consists of a specialized proprietary methodology and framework, robust knowledge in specialized tools and highly trained professionals with a solid knowledge of mobile functional and performance testing expertise across various industries.

Mobile validation strategies must be thorough, yet flexible and efficient. Our approach allows you to ensure that you're covering all bases—embedding the appropriate type of testing and/or service for each project phase and customizing to the project's goals and objectives. Our proven methodologies and approaches will help you increase your confidence level with regards to the quality of the applications you are deploying.
